

# Abrasive brush monofilament

# Consumer goods | Appliances

Print Date: 2024-04-16

#### Benefits

- Heat-stabilized
- High viscositu
- Bio-based (nearly 70% is made from the tropical castor bean plant)
- Low carbon footprint (CO<sub>2</sub> emitted during production offset by CO<sub>2</sub> absorbed by plant growth)
- · Processed through extrusion or injection molding.

### **Details**

EcoPaXX® PA410 is a reliable, sustainable choice for abrasive monofilaments because of its wear and friction properties. The material belongs to the family of long-chain polyamides, which offer exceptional performance in the most demanding of environments. That includes excellent chemical resistance, low moisture absorption, combined with a very high melting point (highest of all bio-plastics) and high crystallization rate. For more information on EcoPaXX PA410 and to request a quote or sample for abrasive monofilaments, contact us.
