

Air Suspension Systems

Automotive

Print Date: 2024-06-20

Benefits

- Akulon® PA6 and PA66 offer best-in-class mechanical strength for air suspension components including pistons, piston pots, contour shells, winding rings, caps, and gaiter pots.
- Akulon® Ultraflow is engineered for easy processing to ensure consistent quality and reduce costs.
- Low carbon footprint grades available to further reduce manufacturing carbon footprint.

Details

Envalior is a global leader in advanced material science for the automotive industry. We offer a robust portfolio of strong, lightweight, easy-to-process, and sustainable materials to support the growing use of air suspensions for the automotive and specialty vehicle industries. At the same time, our experienced global application development and CAE design teams can help accelerate the design process.
