

Arc Chamber

Electrical / Electrical Components

Print Date: 2024-03-14

Benefits

- The arc chamber is a critical part in different LVSG devices. It helps to split or lengthen and cool the arc. When Stanyl® CR310 is used for the arc chamber it supports produced gases (when the arc plasma flows over it) which help to quench the arc more rapidly as compared to traditional support materials. Early arc extinction helps to enhance the breaking performance of the product and also reduces soot formation or leakage currents considerably.

Details

Releasing of gases which cool the arc rapidly; Stanyl® offers high thermomechanical withstandability; Stanyl® enables snap fitting; Stanyl® allows easier production and recyclable
