

Bezels and AFL Frames

Automotive / Exterior / Automotive Lighting

Print Date: 2025-12-05

Benefits

- Reliable
- Low outgassing behavior
- Long term road visibility
- Cost effective

Details

Arnite® XL is a reliable choice for applications such as bezels and AFL frames due to its very low outgassing behavior that ensures good long term road visibility. Its high dimensional stability, when compared to PA, results in less beam vibration, allowing the switch to LED/Xenon and AFL/DBL. Its thermodynamicity (20° C lower surface temperatures than with standard grades). It is also more cost effective than PPS and PPA.

Products

Arnite® AV2 390 XL
