

Cylinder head cover for 2-wheelers

Transportation | 2Wheelers

Print Date: 2024-10-15

Benefits

- The Cylinder head cover has to seal the engine oil and air between the engine room and cylinder head. However, in the case of a 2wheel, they are often connected by 2 to 4 bolts where a rubber gasket is used. The rubber gasket has a high reaction force so flange of the cylinder head often leaks out between the cylinder head and the head cover.

Details

Akulon® K224-HG6 results in reduction of molding time because the molding flow of Akulon is better than competitor grades; Akulon offers high creep
