

DDR DIMM Connectors

Electronics / Connectors

Print Date: 2024-08-30

Benefits

- Sustainable solution due to good carbon footprint
- Flame retardant
- Halogen-free
- Red-phosphorous free

Details

ForTii® PA4T is a reliable solution for DDR DIMM connectors due to its excellent stiffness and high heat deflection temperature (HDT) under load and its excellent low warpage behavior after reflow soldering, outperforming liquid crystal polymers (LCPs) and polyphthalamides (PPAs). ForTii enables DDR manufacturers to produce applications with reduced weight and height, enabling easy rework at lower temperature loads, with fewer heat traps and better thermal airflow.
