

Filter box

Consumer goods / Household utensils

Print Date: 2024-11-12

Benefits

- The filter box in an automatic coffee machine is used to filtrate and collect the coffee bean fragment and skin during grinding process after fresh bean baking. Hence the air take out of those fragments will be hot (around 130C during the the process), which results the part to suffer from high temperature.

Details

Xytron™ offers excellent dimensional stability after molding and shows low creep during the heat age test; Xytron™ is able to withstand long term heat testing at 130C and shows little change of mechanical properties; Xytron™ provides provide low smell & emission during the roasting of the coffee bean, which ensure the coffee tastes well after the brewing process; Material has a metal feel to it when touched
