Benefits

- · Reliable
- Lightweight
- Low outgassing behavior
- · Long term road visibility
- Cost effective

Details

Arnite® XL-T is a reliable choice for applications such as foglamps due to its very low outgassing behavior that ensures good long term road visibility, as well as its thermoconductivity (20° C lower surface temperatures than with standard grades). Compared to metal, Arnite® XL-T is a 40-50% lighter solution. Its high dimensional stability, compared to PA, results in less beam vibration allowing the switch to LED/Xenon and AFL/DBL. Arnite® XL-T is also more cost effective than PPS and PPA.

Products

Seller represents and warrants exclusively that on the date of delivery by Seller the product shall be in conformity with the specifications agreed upon. Seller makes no other representations or warranties, whether express or implied.

Seller is not responsible or liable for the design of the products of the Customer and it is the responsibility of the Customer to determine that the Seller's product is safe, complies with application laws and regulations, and is technically or otherwise fit for its intended use. Seller does not endorse or claim suitability of its products for a specific application and disclaims each and every representation or warranty, whether express or implied, in that respect.
