

# Garlic press

## Consumer goods | Household utensils

Print Date: 2024-11-19

### Benefits

- Glass-reinforced
- Lower mold pressure
- Lower energy consumption
- Shorter cooling time
- Enables thinner wall designs

### Details

Akulon® UltraFlow PA6 is a lightweight, cost-effective solution for kitchen utensils such as a garlic press; no corrosion protection is needed. It yields a better surface appearance than PA66 and PPA, even at 50% to 60% GF. Akulon Ultraflow K-FHG6 easily fills complex molds, offering greater design freedom for manufacturers. It delivers low cycle times with a 40% savings in production time compared to other polyamides. This results in lower investment in machine and molds due to lower mold pressure, lower energy consumption and shorter cooling time.

### Products
