

Hair Curler Brushes

Consumer goods / Appliances

Print Date: 2024-03-14

Benefits

- Stanyl® PA46 is a reliable solution for hair curler brushes due to much higher HDT levels than PA66. It allows for cost-effective solutions due to its good processability (much easier to process than PPS) and its high flowability. Because Stanyl retains its mechanical properties at high temperatures up to 220°C (428°F), this makes it ideal for extremely high-performance applications, where it outperforms PPA, PA6T, PA9T, and often PPS and LCP. Stanyl TE250F6 is UL94 V0-certified.

Details

Enables thin wall designs; Electro-friendly; Flame retardant; Creep-resistance; Fatigue-resistance
