- Heat-stabilized
- Strength and resilience
- Easy processing

Details

Akulon® PA6 is a reliable solution for miniature circuit breakers because of its up to 30% improved electrical endurance compared to conventional materials. It allows for more appealing solutions due to enhanced aesthetics. Producers of low-voltage switchgear are turning to more environmentally friendly solutions. Cost reductions can be up to 15% compared to thermoset compounds due to potential reduction of wall thicknesses by up to two-thirds and part integration possibilities.
