

Pipe Fittings

Building & construction | Water management

Print Date: 2024-11-12

Benefits

- Akulon has better surface appearance
- Stanyl solves wear and friction issues
- EcoPaXX has the lowest carbon footprint amongst common polyamides
- Xytron offers extremely good chemical resistance

Details

Envalior is offering a portfolio for water management applications. Akulon® PA6 is a reliable solution for pipe fittings due to its excellent mechanical properties (stiff and tough) and its better surface appearance than PA66. Stanyl® PA46 allows for more economical and reliable solutions than PES or PPSU due to good creep resistance at elevated temperatures. EcoPaXX® PA410 is a 70% biobased alternative for pipe fittings. Xytron™ PPS is a good alternative in more demanding requirements due to super hydrolysis.
