

Railway Pads

Transportation / Railway

Print Date: 2024-03-14

Benefits

- High abrasion resistance
- Excellent load-bearing capacity
- Fatigue and environmental resistance
- High temperature resistance

Details

Arnitel® TPC is a reliable solution for railway pads because of thermoplastic processing advantages over rubber, resulting in faster cycle times compared with other TPEs. It offers consistent performance over temperature ranges from -55°C (-67°F) to 150°C (300°F) and the longest lifetime to failure compared to any other rubber or class of TPEs used in this application. Arnitel ECO TPC is a bio-based alternative.
