

Rectifier

Automotive / Auto Electronics & Electricals / E-Components

Print Date: 2024-06-20

Benefits

- Alternator is used for current switching in motor vehicle. The rectifier is one of the core components in the Alternator. It needs good electrical property and no crack issues caused by vibration. Besides that, optimal dimensional stability is needed as the part is over mold with metal inserts.

Details

Xytron™ provides good flow ability and dimensional stability property; It shows excellent weld line strength and ensures no crack issues when screw push during assembly long time and vibration test
