

Robotic connectors & circuitry

Robotics

Print Date: 2024-09-05

Benefits

- Stanyl® and ForTii® are proven solutions for connectors used by many of the world's leading automakers and electronics manufacturers.
- Superior strength and durability vs liquid crystal polymers (LCP) and other thermoplastics.
- Material solutions formulated for laser direct structuring for precision processing.

Details

Envalior offers a complete portfolio of proven material solutions for E&E connectors used in millions of vehicles and electronic devices, and now robotics connectors and circuitry. This strong track record of success is backed by global manufacturing and an experienced team of application development engineers.
