

Snowboard bindings

Consumer goods | Sports & leisure

Print Date: 2024-08-30

Benefits

- Heat-stabilized
- High viscosity
- Bio-based (nearly 70% is made from the tropical castor bean plant)
- Enables solutions which are 100% carbon neutral from cradle to cradle
- Delivers high performance in cold temperatures

Details

EcoPaXX® PA410 is a reliable, sustainable choice for snowboard bindings due to its excellent mechanical properties, even at low temperatures and high performance. The plastic belongs to the family of long-chain polyamides, which offer exceptional performance in the most demanding of environments. That includes excellent chemical resistance, low moisture absorption, combined with a very high melting point (highest of all bio-plastics) and high crystallization rate.
