Application solutions

Spatulas and Kitchenware

Consumer goods | Household utensils

Benefits

 Stanyl[®] PA46 and Akulon[®] PA66 are reliable solutions for spatulas and other kitchenware. Stanyl PA46 offers much higher melting temperature and HDT than PA66, and both materials have significantly higher melting temperature resistance than PP and PA6. Also, Stanyl TE200F6-FC and EcoPaXX® Q-KG6-FC are food-approved.

Seller represents and warrants exclusively that on the date of delivery by Seller the product shall be in conformity with the specifications agreed upon. Seller makes no other representations or warranties, whether express or implied. Seller is not responsible or liable for the design of the products of the Customer and it is the responsibility of the Customer to determine that the Seller's product is safe, complies with application laws and regulations, and is technically or otherwise fit for its intended use. Seller does not endorse or claim suitability of its products for a specific application and disclaims each and every representation or warranty, whether express or implied, in that respect.

Typical values are indicative only and are not to be construed as being binding specifications. Colorants in the product or other additives may cause significant variations in typical
